

**Payment Card Industry (PCI)  
Data Security Standard  
Self-Assessment Questionnaire C-VT  
and Attestation of Compliance**

---

**Merchants with Web-Based Virtual Payment  
Terminals – No Electronic Cardholder Data Storage**

**Version 3.1**

April 2015

## Document Changes

---

Date	Version	Description
October 2008	1.2	To align content with new PCI DSS v1.2 and to implement minor changes noted since original v1.1.
October 2010	2.0	To align content with new PCI DSS v2.0 requirements and testing procedures.
February 2014	3.0	To align content with PCI DSS v3.0 requirements and testing procedures and incorporate additional response options.
April 2015	3.1	Updated to align with PCI DSS v3.1. For details of PCI DSS changes, see <i>PCI DSS – Summary of Changes from PCI DSS Version 3.0 to 3.1</i> .

## Before You Begin

---

SAQ C-VT has been developed to address requirements applicable to merchants who process cardholder data only via isolated virtual payment terminals on a personal computer connected to the Internet.

A virtual payment terminal is web-browser-based access to an acquirer, processor, or third-party service provider website to authorize payment card transactions, where the merchant manually enters payment card data via a securely connected web browser. Unlike physical terminals, virtual payment terminals do not read data directly from a payment card. Because payment card transactions are entered manually, virtual payment terminals are typically used instead of physical terminals in merchant environments with low transaction volumes.

SAQ C-VT merchants process cardholder data only via a virtual payment terminal and do not store cardholder data on any computer system. These virtual terminals are connected to the Internet to access a third party that hosts the virtual terminal payment-processing function. This third party may be a processor, acquirer, or other third-party service provider who stores, processes, and/or transmits cardholder data to authorize and/or settle merchants' virtual terminal payment transactions.

This SAQ option is intended to apply only to merchants who manually enter a single transaction at a time via a keyboard into an Internet-based virtual terminal solution. SAQ C-VT merchants may be brick-and-mortar (card-present) or mail/telephone-order (card-not-present) merchants.

SAQ C-VT merchants confirm that, for this payment channel:

- Your company's only payment processing is via a virtual payment terminal accessed by an Internet-connected web browser;
- Your company's virtual payment terminal solution is provided and hosted by a PCI DSS validated third-party service provider;
- Your company accesses the PCI DSS-compliant virtual payment terminal solution via a computer that is isolated in a single location, and is not connected to other locations or systems within your environment (this can be achieved via a firewall or network segmentation to isolate the computer from other systems);
- Your company's computer does not have software installed that causes cardholder data to be stored (for example, there is no software for batch processing or store-and-forward);
- Your company's computer does not have any attached hardware devices that are used to capture or store cardholder data (for example, there are no card readers attached);
- Your company does not otherwise receive or transmit cardholder data electronically through any channels (for example, via an internal network or the Internet);
- Your company retains only paper reports or paper copies of receipts, and these documents are not received electronically; **and**
- Your company does not store cardholder data in electronic format.

***This SAQ is not applicable to e-commerce channels.***

This shortened version of the SAQ includes questions that apply to a specific type of small merchant environment, as defined in the above eligibility criteria. If there are PCI DSS requirements applicable to your environment that are not covered in this SAQ, it may be an indication that this SAQ is not suitable for your environment. Additionally, you must still comply with all applicable PCI DSS requirements in order to be PCI DSS compliant.

## PCI DSS Self-Assessment Completion Steps

1. Identify the applicable SAQ for your environment – refer to the *Self-Assessment Questionnaire Instructions and Guidelines* document on PCI SSC website for information.
2. Confirm that your environment is properly scoped and meets the eligibility criteria for the SAQ you are using (as defined in Part 2g of the Attestation of Compliance).
3. Assess your environment for compliance with applicable PCI DSS requirements.
4. Complete all sections of this document:
  - Section 1 (Part 1 & 2 of the AOC) – Assessment Information and Executive Summary.
  - Section 2 – PCI DSS Self-Assessment Questionnaire (SAQ C-VT)
  - Section 3 (Parts 3 & 4 of the AOC) – Validation and Attestation Details and Action Plan for Non-Compliant Requirements (if applicable)
5. Submit the SAQ and Attestation of Compliance, along with any other requested documentation—such as ASV scan reports—to your acquirer, payment brand or other requester.

## Understanding the Self-Assessment Questionnaire

The questions contained in the “PCI DSS Question” column in this self-assessment questionnaire are based on the requirements in the PCI DSS.

Additional resources that provide guidance on PCI DSS requirements and how to complete the self-assessment questionnaire have been provided to assist with the assessment process. An overview of some of these resources is provided below:

Document	Includes:
PCI DSS <i>(PCI Data Security Standard Requirements and Security Assessment Procedures)</i>	<ul style="list-style-type: none"> <li>• Guidance on Scoping</li> <li>• Guidance on the intent of all PCI DSS Requirements</li> <li>• Details of testing procedures</li> <li>• Guidance on Compensating Controls</li> </ul>
SAQ Instructions and Guidelines documents	<ul style="list-style-type: none"> <li>• Information about all SAQs and their eligibility criteria</li> <li>• How to determine which SAQ is right for your organization</li> </ul>
<i>PCI DSS and PA-DSS Glossary of Terms, Abbreviations, and Acronyms</i>	<ul style="list-style-type: none"> <li>• Descriptions and definitions of terms used in the PCI DSS and self-assessment questionnaires</li> </ul>

These and other resources can be found on the PCI SSC website ([www.pcisecuritystandards.org](http://www.pcisecuritystandards.org)). Organizations are encouraged to review the PCI DSS and other supporting documents before beginning an assessment.

### Expected Testing

The instructions provided in the “Expected Testing” column are based on the testing procedures in the PCI DSS, and provide a high-level description of the types of testing activities that should be performed in order to verify that a requirement has been met. Full details of testing procedures for each requirement can be found in the PCI DSS.

## Completing the Self-Assessment Questionnaire

For each question, there is a choice of responses to indicate your company's status regarding that requirement. **Only one response should be selected for each question.**

A description of the meaning for each response is provided in the table below:

Response	When to use this response:
<b>Yes</b>	The expected testing has been performed, and all elements of the requirement have been met as stated.
<b>Yes with CCW</b> (Compensating Control Worksheet)	The expected testing has been performed, and the requirement has been met with the assistance of a compensating control.  All responses in this column require completion of a Compensating Control Worksheet (CCW) in Appendix B of the SAQ.  Information on the use of compensating controls and guidance on how to complete the worksheet is provided in the PCI DSS.
<b>No</b>	Some or all elements of the requirement have not been met, or are in the process of being implemented, or require further testing before it will be known if they are in place.
<b>N/A</b> (Not Applicable)	The requirement does not apply to the organization's environment. (See <i>Guidance for Non-Applicability of Certain, Specific Requirements</i> below for examples.)  All responses in this column require a supporting explanation in Appendix C of the SAQ.

### Guidance for Non-Applicability of Certain, Specific Requirements

While many organizations completing SAQ C-VT will need to validate compliance with every PCI DSS requirement in this SAQ, some organizations with very specific business models may find that some requirements do not apply. For example, a company that does not use wireless technology in any capacity would not be expected to validate compliance with the sections of PCI DSS that are specific to managing wireless technology (for example, Requirements 1.2.3, 2.1.1, and 4.1.1).

If any requirements are deemed not applicable to your environment, select the "N/A" option for that specific requirement, and complete the "Explanation of Non-Applicability" worksheet in Appendix C for each "N/A" entry.

### Legal Exception

If your organization is subject to a legal restriction that prevents the organization from meeting a PCI DSS requirement, check the "No" column for that requirement and complete the relevant attestation in Part 3.

## Section 1: Assessment Information

### Instructions for Submission

This document must be completed as a declaration of the results of the merchant's self-assessment with the *Payment Card Industry Data Security Standard Requirements and Security Assessment Procedures (PCI DSS)*. Complete all sections: The merchant is responsible for ensuring that each section is completed by the relevant parties, as applicable. Contact acquirer (merchant bank) or the payment brands to determine reporting and submission procedures.

### Part 1. Merchant and Qualified Security Assessor Information

#### Part 1a. Merchant Organization Information

Company Name:		DBA (doing business as):	
Contact Name:		Title:	
ISA Name(s) (if applicable):		Title:	
Telephone:		E-mail:	
Business Address:		City:	
State/Province:		Country:	
URL:		Zip:	

#### Part 1b. Qualified Security Assessor Company Information (if applicable)

Company Name:			
Lead QSA Contact Name:		Title:	
Telephone:		E-mail:	
Business Address:		City:	
State/Province:		Country:	
URL:		Zip:	

### Part 2. Executive Summary

#### Part 2a. Type of Merchant Business (check all that apply)

- Retailer
  Telecommunication
  Grocery and Supermarkets  
 Petroleum
  E-Commerce
  Mail order/telephone order (MOTO)

Others (please specify):

What types of payment channels does your business serve?

- Mail order/telephone order (MOTO)  
 E-Commerce  
 Card-present (face-to-face)

Which payment channels are covered by this SAQ?

- Mail order/telephone order (MOTO)  
 E-Commerce  
 Card-present (face-to-face)

**Note:** If your organization has a payment channel or process that is not covered by this SAQ, consult your acquirer or payment brand about validation for the other channels.

### Part 2b. Description of Payment Card Business

How and in what capacity does your business store, process and/or transmit cardholder data?

### Part 2c. Locations

List types of facilities and a summary of locations (for example, retail outlets, corporate offices, data centers, call centers, etc.) included in PCI DSS review.

Type of facility	Number of facilities of this type	Location(s) of facility (city, country)
<i>Example: Retail outlets</i>	3	<i>Boston, MA, USA</i>

### Part 2d. Payment Application

Does the organization use one or more Payment Applications?  Yes  No

Provide the following information regarding the Payment Applications your organization uses:

Payment Application Name	Version Number	Application Vendor	Is application PA-DSS Listed?	PA-DSS Listing Expiry date (if applicable)
			<input type="checkbox"/> Yes <input type="checkbox"/> No	
			<input type="checkbox"/> Yes <input type="checkbox"/> No	
			<input type="checkbox"/> Yes <input type="checkbox"/> No	

### Part 2e. Description of Environment

Provide a **high-level** description of the environment covered by this assessment.

*For example:*

- *Connections into and out of the cardholder data environment (CDE).*
- *Critical system components within the CDE, such as POS devices, databases, web servers, etc., and any other necessary payment components, as applicable.*

Does your business use network segmentation to affect the scope of your PCI DSS environment?

*(Refer to "Network Segmentation" section of PCI DSS for guidance on network segmentation)*

Yes

No

### Part 2f. Third-Party Service Providers

Does your company share cardholder data with any third-party service providers (for example, gateways, payment processors, payment service providers (PSP), web-hosting companies, airline booking agents, loyalty program agents, etc.)?  Yes  No

**If Yes:**

Name of service provider:	Description of services provided:

**Note:** Requirement 12.8 applies to all entities in this list.

### Part 2g. Eligibility to Complete SAQ C-VT

Merchant certifies eligibility to complete this shortened version of the Self-Assessment Questionnaire because, for this payment channel:

<input type="checkbox"/>	Merchant's only payment processing is via a virtual payment terminal accessed by an Internet-connected web browser;
<input type="checkbox"/>	Merchant's virtual payment terminal solution is provided and hosted by a PCI DSS validated third-party service provider;
<input type="checkbox"/>	Merchant accesses the PCI DSS-compliant virtual terminal solution via a computer that is isolated in a single location and is not connected to other locations or systems within the merchant environment;
<input type="checkbox"/>	Merchant's computer does not have software installed that causes cardholder data to be stored (for example, there is no software for batch processing or store-and-forward);
<input type="checkbox"/>	Merchant's computer does not have any attached hardware devices that are used to capture or store cardholder data (for example, there are no card readers attached);
<input type="checkbox"/>	Merchant does not otherwise receive or transmit cardholder data electronically through any channels (for example, via an internal network or the Internet);
<input type="checkbox"/>	Merchant does not store cardholder data in electronic format; <b>and</b>
<input type="checkbox"/>	If Merchant does store cardholder data, such data is only paper reports or copies of paper receipts and is not received electronically.

## Section 2: Self-Assessment Questionnaire C-VT

**Note:** The following questions are numbered according to PCI DSS requirements and testing procedures, as defined in the PCI DSS Requirements and Security Assessment Procedures document.

Self-assessment completion date:

### Build and Maintain a Secure Network and Systems

#### Requirement 1: Install and maintain a firewall configuration to protect data

PCI DSS Question	Expected Testing	Response (Check one response for each question)				
		Yes	Yes with CCW	No	N/A	
1.2	Do firewall and router configurations restrict connections between untrusted networks and any system in the cardholder data environment as follows:  <b>Note:</b> An “untrusted network” is any network that is external to the networks belonging to the entity under review, and/or which is out of the entity’s ability to control or manage.					
1.2.1	(a) Is inbound and outbound traffic restricted to that which is necessary for the cardholder data environment?	<ul style="list-style-type: none"> <li>Review firewall and router configuration standards</li> <li>Examine firewall and router configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(b) Is all other inbound and outbound traffic specifically denied (for example by using an explicit “deny all” or an implicit deny after allow statement)?	<ul style="list-style-type: none"> <li>Review firewall and router configuration standards</li> <li>Examine firewall and router configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
1.2.3	Are perimeter firewalls installed between all wireless networks and the cardholder data environment, and are these firewalls configured to deny or, if traffic is necessary for business purposes, permit only authorized traffic between the wireless environment and the cardholder data environment?	<ul style="list-style-type: none"> <li>Review firewall and router configuration standards</li> <li>Examine firewall and router configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
1.3	Is direct public access prohibited between the Internet and any system component in the cardholder data environment, as follows:					
1.3.3	Are direct connections prohibited for inbound or outbound traffic between the Internet and the cardholder data environment?	<ul style="list-style-type: none"> <li>Examine firewall and router configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
1.3.5	Is outbound traffic from the cardholder data environment to the Internet explicitly authorized?	<ul style="list-style-type: none"> <li>Examine firewall and router configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
1.3.6	Is stateful inspection, also known as dynamic packet filtering, implemented—that is, only established connections are allowed into the network?	<ul style="list-style-type: none"> <li>Examine firewall and router configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
1.4	(a) Is personal firewall software installed and active on any mobile and/or employee-owned devices that connect to the Internet when outside the network (for example, laptops used by employees), and which are also used to access the network?	<ul style="list-style-type: none"> <li>Review policies and configuration standards</li> <li>Examine mobile and/or employee-owned devices</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(b) Is the personal firewall software configured to specific configuration settings, actively running, and not alterable by users of mobile and/or employee-owned devices?	<ul style="list-style-type: none"> <li>Review policies and configuration standards</li> <li>Examine mobile and/or employee-owned devices</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**Requirement 2: Do not use vendor-supplied defaults for system passwords and other security parameters**

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
2.1	(a) Are vendor-supplied defaults always changed before installing a system on the network? <i>This applies to ALL default passwords, including but not limited to those used by operating systems, software that provides security services, application and system accounts, point-of-sale (POS) terminals, Simple Network Management Protocol (SNMP) community strings, etc.).</i>	<ul style="list-style-type: none"> <li>Review policies and procedures</li> <li>Examine vendor documentation</li> <li>Observe system configurations and account settings</li> <li>Interview personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(b) Are unnecessary default accounts removed or disabled before installing a system on the network?	<ul style="list-style-type: none"> <li>Review policies and procedures</li> <li>Review vendor documentation</li> <li>Examine system configurations and account settings</li> <li>Interview personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2.1.1	For wireless environments connected to the cardholder data environment or transmitting cardholder data, are ALL wireless vendor defaults changed at installations, as follows:					
	(a) Are encryption keys changed from default at installation, and changed anytime anyone with knowledge of the keys leaves the company or changes positions?	<ul style="list-style-type: none"> <li>Review policies and procedures</li> <li>Review vendor documentation</li> <li>Interview personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(b) Are default SNMP community strings on wireless devices changed at installation?	<ul style="list-style-type: none"> <li>Review policies and procedures</li> <li>Review vendor documentation</li> <li>Interview personnel</li> <li>Examine system configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(c) Are default passwords/passphrases on access points changed at installation?	<ul style="list-style-type: none"> <li>Review policies and procedures</li> <li>Interview personnel</li> <li>Examine system configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
	(d) Is firmware on wireless devices updated to support strong encryption for authentication and transmission over wireless networks?	<ul style="list-style-type: none"> <li>▪ Review policies and procedures</li> <li>▪ Review vendor documentation</li> <li>▪ Examine system configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(e) Are other security-related wireless vendor defaults changed, if applicable?	<ul style="list-style-type: none"> <li>▪ Review policies and procedures</li> <li>▪ Review vendor documentation</li> <li>▪ Examine system configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2.2.2	(a) Are only necessary services, protocols, daemons, etc. enabled as required for the function of the system (services and protocols not directly needed to perform the device's specified function are disabled)?	<ul style="list-style-type: none"> <li>▪ Review configuration standards</li> <li>▪ Examine system configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(b) Are all enabled insecure services, daemons, or protocols justified per documented configuration standards?	<ul style="list-style-type: none"> <li>▪ Review configuration standards</li> <li>▪ Interview personnel</li> <li>▪ Examine configuration settings</li> <li>▪ Compare enabled services, etc. to documented justifications</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

PCI DSS Question	Expected Testing	Response (Check one response for each question)				
		Yes	Yes with CCW	No	N/A	
<p>2.2.3 Are additional security features documented and implemented for any required services, protocols or daemons that are considered to be insecure?</p> <p><i>For example, use secured technologies such as SSH, S-FTP, TLS, or IPSec VPN to protect insecure services such as NetBIOS, file-sharing, Telnet, FTP, etc.</i></p> <p><b>Note:</b> <i>SSL and early TLS are not considered strong cryptography and cannot be used as a security control after 30th June, 2016. Prior to this date, existing implementations that use SSL and/or early TLS must have a formal Risk Mitigation and Migration Plan in place.</i></p> <p><i>Effective immediately, new implementations must not use SSL or early TLS.</i></p> <p><i>POS POI terminals (and the SSL/TLS termination points to which they connect) that can be verified as not being susceptible to any known exploits for SSL and early TLS may continue using these as a security control after 30th June, 2016.</i></p>	<ul style="list-style-type: none"> <li>Review configuration standards</li> <li>Examine configuration settings</li> </ul> <p><i>If SSL/early TLS is used:</i></p> <ul style="list-style-type: none"> <li>Review documentation that verifies POS POI devices are not susceptible to any known exploits for SSL/early TLS</li> </ul> <p><i>and/or</i></p> <ul style="list-style-type: none"> <li>Review Risk Mitigation and Migration Plan</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
2.2.4	(a) Are system administrators and/or personnel that configure system components knowledgeable about common security parameter settings for those system components?	<ul style="list-style-type: none"> <li>Interview personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(b) Are common system security parameters settings included in the system configuration standards?	<ul style="list-style-type: none"> <li>Review system configuration standards</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(c) Are security parameter settings set appropriately on system components?	<ul style="list-style-type: none"> <li>Examine system components</li> <li>Examine security parameter settings</li> <li>Compare settings to system configuration standards</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2.2.5	(a) Has all unnecessary functionality—such as scripts, drivers, features, subsystems, file systems, and unnecessary web servers—been removed?	<ul style="list-style-type: none"> <li>Examine security parameters on system components</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

PCI DSS Question	Expected Testing	Response (Check one response for each question)			
		Yes	Yes with CCW	No	N/A
(b) Are enabled functions documented and do they support secure configuration?	<ul style="list-style-type: none"> <li>Review documentation</li> <li>Examine security parameters on system components</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(c) Is only documented functionality present on system components?	<ul style="list-style-type: none"> <li>Review documentation</li> <li>Examine security parameters on system components</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2.3	<p>Is non-console administrative access encrypted as follows:  <i>Use technologies such as SSH, VPN, or TLS for web-based management and other non-console administrative access.</i></p> <p><b>Note:</b> <i>SSL and early TLS are not considered strong cryptography and cannot be used as a security control after 30th June, 2016. Prior to this date, existing implementations that use SSL and/or early TLS must have a formal Risk Mitigation and Migration Plan in place.</i></p> <p><i>Effective immediately, new implementations must not use SSL or early TLS.</i></p> <p><i>POS POI terminals (and the SSL/TLS termination points to which they connect) that can be verified as not being susceptible to any known exploits for SSL and early TLS may continue using these as a security control after 30th June, 2016.</i></p>				
(a) Is all non-console administrative access encrypted with strong cryptography, and is a strong encryption method invoked before the administrator's password is requested?	<ul style="list-style-type: none"> <li>Examine system components</li> <li>Examine system configurations</li> <li>Observe an administrator log on</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(b) Are system services and parameter files configured to prevent the use of Telnet and other insecure remote login commands?	<ul style="list-style-type: none"> <li>Examine system components</li> <li>Examine services and files</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(c) Is administrator access to web-based management interfaces encrypted with strong cryptography?	<ul style="list-style-type: none"> <li>Examine system components</li> <li>Observe an administrator log on</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

PCI DSS Question	Expected Testing	Response (Check one response for each question)			
		Yes	Yes with CCW	No	N/A
(d) For the technology in use, is strong cryptography implemented according to industry best practice and/or vendor recommendations?	<ul style="list-style-type: none"> <li>▪ Examine system components</li> <li>▪ Review vendor documentation</li> <li>▪ Interview personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(e) <i>For POS POI terminals (and the SSL/TLS termination points to which they connect) using SSL and/or early TLS and for which the entity asserts are not susceptible to any known exploits for those protocols:</i> Is there documentation (for example, vendor documentation, system/network configuration details, etc.) that verifies the devices are not susceptible to any known exploits for SSL/early TLS?	<ul style="list-style-type: none"> <li>▪ Review documentation that verifies POS POI devices are not susceptible to any known exploits for SSL/early TLS</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(f) <i>For all other environments using SSL and/or early TLS:</i> Does the documented Risk Mitigation and Migration Plan include the following? <ul style="list-style-type: none"> <li>▪ Description of usage, including; what data is being transmitted, types and number of systems that use and/or support SSL/early TLS, type of environment;</li> <li>▪ Risk assessment results and risk reduction controls in place;</li> <li>▪ Description of processes to monitor for new vulnerabilities associated with SSL/early TLS;</li> <li>▪ Description of change control processes that are implemented to ensure SSL/early TLS is not implemented into new environments;</li> <li>▪ Overview of migration project plan including target migration completion date no later than 30th June 2016.</li> </ul>	<ul style="list-style-type: none"> <li>▪ Review Risk Mitigation and Migration Plan</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## Protect Cardholder Data

### Requirement 3: Protect stored cardholder data

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
3.2	(c) Is sensitive authentication data deleted or rendered unrecoverable upon completion of the authorization process?	<ul style="list-style-type: none"> <li>▪ Review policies and procedures</li> <li>▪ Examine system configurations</li> <li>▪ Examine deletion processes</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(d) Do all systems adhere to the following requirements regarding non-storage of sensitive authentication data after authorization (even if encrypted):					
3.2.2	The card verification code or value (three-digit or four-digit number printed on the front or back of a payment card) is not stored after authorization?	<ul style="list-style-type: none"> <li>▪ Examine data sources including:               <ul style="list-style-type: none"> <li>• Incoming transaction data</li> <li>• All logs</li> <li>• History files</li> <li>• Trace files</li> <li>• Database schema</li> <li>• Database contents</li> </ul> </li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3.2.3	The personal identification number (PIN) or the encrypted PIN block is not stored after authorization?	<ul style="list-style-type: none"> <li>▪ Examine data sources including:               <ul style="list-style-type: none"> <li>• Incoming transaction data</li> <li>• All logs</li> <li>• History files</li> <li>• Trace files</li> <li>• Database schema</li> <li>• Database contents</li> </ul> </li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3.3	<p>Is the PAN masked when displayed (the first six and last four digits are the maximum number of digits to be displayed) such that only personnel with a legitimate business need can see the full PAN?</p> <p><b>Note:</b> This requirement does not supersede stricter requirements in place for displays of cardholder data—for example, legal or payment card brand requirements for point-of-sale (POS) receipts.</p>	<ul style="list-style-type: none"> <li>▪ Review policies and procedures</li> <li>▪ Review roles that need access to displays of full PAN</li> <li>▪ Examine system configurations</li> <li>▪ Observe displays of PAN</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**Requirement 4: Encrypt transmission of cardholder data across open, public networks**

PCI DSS Question	Expected Testing	Response (Check one response for each question)			
		Yes	Yes with CCW	No	N/A
<p>4.1 (a) Are strong cryptography and security protocols, such as TLS, SSH or IPSEC, used to safeguard sensitive cardholder data during transmission over open, public networks?</p> <p><i>Examples of open, public networks include but are not limited to the Internet; wireless technologies, including 802.11 and Bluetooth; cellular technologies, for example, Global System for Mobile communications (GSM), Code division multiple access (CDMA); and General Packet Radio Service (GPRS).</i></p> <p><b>Note:</b> SSL and early TLS are not considered strong cryptography and cannot be used as a security control after 30th June, 2016. Prior to this date, existing implementations that use SSL and/or early TLS must have a formal Risk Mitigation and Migration Plan in place.</p> <p><i>Effective immediately, new implementations must not use SSL or early TLS.</i></p> <p><i>POS POI terminals (and the SSL/TLS termination points to which they connect) that can be verified as not being susceptible to any known exploits for SSL and early TLS may continue using these as a security control after 30th June, 2016.</i></p>	<ul style="list-style-type: none"> <li>Review documented standards</li> <li>Review policies and procedures</li> <li>Review all locations where CHD is transmitted or received</li> <li>Examine system configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(b) Are only trusted keys and/or certificates accepted?	<ul style="list-style-type: none"> <li>Observe inbound and outbound transmissions</li> <li>Examine keys and certificates</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(c) Are security protocols implemented to use only secure configurations, and to not support insecure versions or configurations?	<ul style="list-style-type: none"> <li>Examine system configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(d) Is the proper encryption strength implemented for the encryption methodology in use (check vendor recommendations/best practices)?	<ul style="list-style-type: none"> <li>Review vendor documentation</li> <li>Examine system configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

PCI DSS Question	Expected Testing	Response (Check one response for each question)			
		Yes	Yes with CCW	No	N/A
<p>(e) For TLS implementations, is TLS enabled whenever cardholder data is transmitted or received?</p> <p><i>For example, for browser-based implementations:</i></p> <ul style="list-style-type: none"> <li>• “HTTPS” appears as the browser Universal Record Locator (URL) protocol, and</li> <li>• Cardholder data is only requested if “HTTPS” appears as part of the URL.</li> </ul>	<ul style="list-style-type: none"> <li>▪ Examine system configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<p>(f) For POS POI terminals (and the SSL/TLS termination points to which they connect) using SSL and/or early TLS and for which the entity asserts are not susceptible to any known exploits for those protocols:</p> <p>Is there documentation (for example, vendor documentation, system/network configuration details, etc.) that verifies the devices are not susceptible to any known exploits for SSL/early TLS?</p>	<ul style="list-style-type: none"> <li>▪ Review documentation that verifies POS POI devices are not susceptible to any known exploits for SSL/early TLS</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<p>(g) For all other environments using SSL and/or early TLS: Does the documented Risk Mitigation and Migration Plan include the following?</p> <ul style="list-style-type: none"> <li>▪ Description of usage, including; what data is being transmitted, types and number of systems that use and/or support SSL/early TLS, type of environment;</li> <li>▪ Risk assessment results and risk reduction controls in place;</li> <li>▪ Description of processes to monitor for new vulnerabilities associated with SSL/early TLS;</li> <li>▪ Description of change control processes that are implemented to ensure SSL/early TLS is not implemented into new environments;</li> <li>▪ Overview of migration project plan including target migration completion date no later than 30th June 2016.</li> </ul>	<ul style="list-style-type: none"> <li>▪ Review Risk Mitigation and Migration Plan</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
4.1.1	<p>Are industry best practices (for example, IEEE 802.11i) used to implement strong encryption for authentication and transmission for wireless networks transmitting cardholder data or connected to the cardholder data environment?</p> <p><b>Note:</b> <i>The use of WEP as a security control is prohibited.</i></p>	<ul style="list-style-type: none"> <li>▪ Review documented standards</li> <li>▪ Review wireless networks</li> <li>▪ Examine system configuration settings</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4.2	(b) Are policies in place that state that unprotected PANs are not to be sent via end-user messaging technologies?	<ul style="list-style-type: none"> <li>▪ Review policies and procedures</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## Maintain a Vulnerability Management Program

### Requirement 5: Protect all systems against malware and regularly update anti-virus software or programs

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
5.1	Is anti-virus software deployed on all systems commonly affected by malicious software?	<ul style="list-style-type: none"> <li>Examine system configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5.1.1	Are anti-virus programs capable of detecting, removing, and protecting against all known types of malicious software (for example, viruses, Trojans, worms, spyware, adware, and rootkits)?	<ul style="list-style-type: none"> <li>Review vendor documentation</li> <li>Examine system configurations</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5.1.2	Are periodic evaluations performed to identify and evaluate evolving malware threats in order to confirm whether those systems considered to not be commonly affected by malicious software continue as such?	<ul style="list-style-type: none"> <li>Interview personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5.2	Are all anti-virus mechanisms maintained as follows:					
	(a) Are all anti-virus software and definitions kept current?	<ul style="list-style-type: none"> <li>Examine policies and procedures</li> <li>Examine anti-virus configurations, including the master installation</li> <li>Examine system components</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(b) Are automatic updates and periodic scans enabled and being performed?	<ul style="list-style-type: none"> <li>Examine anti-virus configurations, including the master installation</li> <li>Examine system components</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(c) Are all anti-virus mechanisms generating audit logs, and are logs retained in accordance with PCI DSS Requirement 10.7?	<ul style="list-style-type: none"> <li>Examine anti-virus configurations</li> <li>Review log retention processes</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
5.3	<p>Are all anti-virus mechanisms:</p> <ul style="list-style-type: none"> <li>▪ Actively running?</li> <li>▪ Unable to be disabled or altered by users?</li> </ul> <p><b>Note:</b> <i>Anti-virus solutions may be temporarily disabled only if there is legitimate technical need, as authorized by management on a case-by-case basis. If anti-virus protection needs to be disabled for a specific purpose, it must be formally authorized. Additional security measures may also need to be implemented for the period of time during which anti-virus protection is not active.</i></p>	<ul style="list-style-type: none"> <li>▪ Examine anti-virus configurations</li> <li>▪ Examine system components</li> <li>▪ Observe processes</li> <li>▪ Interview personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**Requirement 6: Develop and maintain secure systems and applications**

PCI DSS Question	Expected Testing	Response (Check one response for each question)			
		Yes	Yes with CCW	No	N/A
<p>6.1</p> <p>Is there a process to identify security vulnerabilities, including the following:</p> <ul style="list-style-type: none"> <li>▪ Using reputable outside sources for vulnerability information?</li> <li>▪ Assigning a risk ranking to vulnerabilities that includes identification of all “high” risk and “critical” vulnerabilities?</li> </ul> <p><b>Note:</b> Risk rankings should be based on industry best practices as well as consideration of potential impact. For example, criteria for ranking vulnerabilities may include consideration of the CVSS base score and/or the classification by the vendor, and/or type of systems affected.</p> <p>Methods for evaluating vulnerabilities and assigning risk ratings will vary based on an organization’s environment and risk assessment strategy. Risk rankings should, at a minimum, identify all vulnerabilities considered to be a “high risk” to the environment. In addition to the risk ranking, vulnerabilities may be considered “critical” if they pose an imminent threat to the environment, impact critical systems, and/or would result in a potential compromise if not addressed. Examples of critical systems may include security systems, public-facing devices and systems, databases, and other systems that store, process or transmit cardholder data.</p>	<ul style="list-style-type: none"> <li>▪ Review policies and procedures</li> <li>▪ Interview personnel</li> <li>▪ Observe processes</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<p>6.2</p> <p>(a) Are all system components and software protected from known vulnerabilities by installing applicable vendor-supplied security patches?</p> <p>(b) Are critical security patches installed within one month of release?</p> <p><b>Note:</b> Critical security patches should be identified according to the risk ranking process defined in Requirement 6.1.</p>	<ul style="list-style-type: none"> <li>▪ Review policies and procedures</li> <li>▪ Examine system components</li> <li>▪ Compare list of security patches installed to recent vendor patch lists</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## Implement Strong Access Control Measures

### Requirement 7: Restrict access to cardholder data by business need to know

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
7.1	Is access to system components and cardholder data limited to only those individuals whose jobs require such access, as follows:					
7.1.2	Is access to privileged user IDs restricted as follows: <ul style="list-style-type: none"> <li>▪ To least privileges necessary to perform job responsibilities?</li> <li>▪ Assigned only to roles that specifically require that privileged access?</li> </ul>	<ul style="list-style-type: none"> <li>▪ Examine written access control policy</li> <li>▪ Interview personnel</li> <li>▪ Interview management</li> <li>▪ Review privileged user IDs</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.1.3	Are access assigned based on individual personnel's job classification and function?	<ul style="list-style-type: none"> <li>▪ Examine written access control policy</li> <li>▪ Interview management</li> <li>▪ Review user IDs</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**Requirement 9: Restrict physical access to cardholder data**

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
9.5	Are all media physically secured (including but not limited to computers, removable electronic media, paper receipts, paper reports, and faxes)?  <i>For purposes of Requirement 9, "media" refers to all paper and electronic media containing cardholder data.</i>	<ul style="list-style-type: none"> <li>Review policies and procedures for physically securing media</li> <li>Interview personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9.6	(a) Is strict control maintained over the internal or external distribution of any kind of media?	<ul style="list-style-type: none"> <li>Review policies and procedures for distribution of media</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(b) Do controls include the following:					
9.6.1	Is media classified so the sensitivity of the data can be determined?	<ul style="list-style-type: none"> <li>Review policies and procedures for media classification</li> <li>Interview security personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9.6.2	Is media sent by secured courier or other delivery method that can be accurately tracked?	<ul style="list-style-type: none"> <li>Interview personnel</li> <li>Examine media distribution tracking logs and documentation</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9.6.3	Is management approval obtained prior to moving the media (especially when media is distributed to individuals)?	<ul style="list-style-type: none"> <li>Interview personnel</li> <li>Examine media distribution tracking logs and documentation</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9.7	Is strict control maintained over the storage and accessibility of media?	<ul style="list-style-type: none"> <li>Review policies and procedures</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9.8	(a) Is all media destroyed when it is no longer needed for business or legal reasons?	<ul style="list-style-type: none"> <li>Review periodic media destruction policies and procedures</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(c) Is media destruction performed as follows:					

PCI DSS Question		Expected Testing	Response <i>(Check one response for each question)</i>			
			Yes	Yes with CCW	No	N/A
9.8.1	(a) Are hardcopy materials cross-cut shredded, incinerated, or pulped so that cardholder data cannot be reconstructed?	<ul style="list-style-type: none"> <li>▪ Review periodic media destruction policies and procedures</li> <li>▪ Interview personnel</li> <li>▪ Observe processes</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(b) Are storage containers used for materials that contain information to be destroyed secured to prevent access to the contents?	<ul style="list-style-type: none"> <li>▪ Review periodic media destruction policies and procedures</li> <li>▪ Examine security of storage containers</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## Maintain an Information Security Policy

### Requirement 12: Maintain a policy that addresses information security for all personnel

**Note:** For the purposes of Requirement 12, “personnel” refers to full-time part-time employees, temporary employees and personnel, and contractors and consultants who are “resident” on the entity’s site or otherwise have access to the company’s site cardholder data environment.

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
12.1	Is a security policy established, published, maintained, and disseminated to all relevant personnel?	<ul style="list-style-type: none"> <li>Review the information security policy</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.1.1	Is the security policy reviewed at least annually and updated when the environment changes?	<ul style="list-style-type: none"> <li>Review the information security policy</li> <li>Interview responsible personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.3	Are usage policies for critical technologies developed to define proper use of these technologies and require the following:  <b>Note:</b> Examples of critical technologies include, but are not limited to, remote access and wireless technologies, laptops, tablets, removable electronic media, e-mail usage and Internet usage.					
12.3.1	Explicit approval by authorized parties to use the technologies?	<ul style="list-style-type: none"> <li>Review usage policies</li> <li>Interview responsible personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.3.3	A list of all such devices and personnel with access?	<ul style="list-style-type: none"> <li>Review usage policies</li> <li>Interview responsible personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.3.5	Acceptable uses of the technologies?	<ul style="list-style-type: none"> <li>Review usage policies</li> <li>Interview responsible personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.4	Do security policy and procedures clearly define information security responsibilities for all personnel?	<ul style="list-style-type: none"> <li>Review information security policy and procedures</li> <li>Interview a sample of responsible personnel</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.5	(b) Are the following information security management responsibilities formally assigned to an individual or team:					

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
12.5.3	Establishing, documenting, and distributing security incident response and escalation procedures to ensure timely and effective handling of all situations?	<ul style="list-style-type: none"> <li>Review information security policy and procedures</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.6	(a) Is a formal security awareness program in place to make all personnel aware of the importance of cardholder data security?	<ul style="list-style-type: none"> <li>Review security awareness program</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.8	Are policies and procedures maintained and implemented to manage service providers with whom cardholder data is shared, or that could affect the security of cardholder data, as follows:					
12.8.1	Is a list of service providers maintained?	<ul style="list-style-type: none"> <li>Review policies and procedures</li> <li>Observe processes</li> <li>Review list of service providers</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.8.2	<p>Is a written agreement maintained that includes an acknowledgement that the service providers are responsible for the security of cardholder data the service providers possess or otherwise store, process, or transmit on behalf of the customer, or to the extent that they could impact the security of the customer's cardholder data environment?</p> <p><b>Note:</b> The exact wording of an acknowledgement will depend on the agreement between the two parties, the details of the service being provided, and the responsibilities assigned to each party. The acknowledgement does not have to include the exact wording provided in this requirement.</p>	<ul style="list-style-type: none"> <li>Observe written agreements</li> <li>Review policies and procedures</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.8.3	Is there an established process for engaging service providers, including proper due diligence prior to engagement?	<ul style="list-style-type: none"> <li>Observe processes</li> <li>Review policies and procedures and supporting documentation</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.8.4	Is a program maintained to monitor service providers' PCI DSS compliance status at least annually?	<ul style="list-style-type: none"> <li>Observe processes</li> <li>Review policies and procedures and supporting documentation</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

PCI DSS Question		Expected Testing	Response (Check one response for each question)			
			Yes	Yes with CCW	No	N/A
12.8.5	Is information maintained about which PCI DSS requirements are managed by each service provider, and which are managed by the entity?	<ul style="list-style-type: none"> <li>▪ Observe processes</li> <li>▪ Review policies and procedures and supporting documentation</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12.10.1	(a) Has an incident response plan been created to be implemented in the event of system breach?	<ul style="list-style-type: none"> <li>▪ Review the incident response plan</li> <li>▪ Review incident response plan procedures</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## **Appendix A: Additional PCI DSS Requirements for Shared Hosting Providers**

This appendix is not used for merchant assessments.

## Appendix B: Compensating Controls Worksheet

Use this worksheet to define compensating controls for any requirement where “YES with CCW” was checked.

**Note:** Only companies that have undertaken a risk analysis and have legitimate technological or documented business constraints can consider the use of compensating controls to achieve compliance.

Refer to Appendices B, C, and D of PCI DSS for information about compensating controls and guidance on how to complete this worksheet.

### Requirement Number and Definition:

	Information Required	Explanation
1. <b>Constraints</b>	List constraints precluding compliance with the original requirement.	
2. <b>Objective</b>	Define the objective of the original control; identify the objective met by the compensating control.	
3. <b>Identified Risk</b>	Identify any additional risk posed by the lack of the original control.	
4. <b>Definition of Compensating Controls</b>	Define the compensating controls and explain how they address the objectives of the original control and the increased risk, if any.	
5. <b>Validation of Compensating Controls</b>	Define how the compensating controls were validated and tested.	
6. <b>Maintenance</b>	Define process and controls in place to maintain compensating controls.	

## Section 3: Validation and Attestation Details

### Part 3. PCI DSS Validation

Based on the results noted in the SAQ C-VT dated (*completion date*), the signatories identified in Parts 3b-3d, as applicable, assert(s) the following compliance status for the entity identified in Part 2 of this document as of (*date*): (**check one**):

- Compliant:** All sections of the PCI DSS SAQ are complete, all questions answered affirmatively, resulting in an overall **COMPLIANT** rating; thereby (*Merchant Company Name*) has demonstrated full compliance with the PCI DSS.
- Non-Compliant:** Not all sections of the PCI DSS SAQ are complete, or not all questions are answered affirmatively, resulting in an overall **NON-COMPLIANT** rating, thereby (*Merchant Company Name*) has not demonstrated full compliance with the PCI DSS.  
**Target Date** for Compliance:  
 An entity submitting this form with a status of Non-Compliant may be required to complete the Action Plan in Part 4 of this document. *Check with your acquirer or the payment brand(s) before completing Part 4.*
- Compliant but with Legal exception:** One or more requirements are marked “No” due to a legal restriction that prevents the requirement from being met. This option requires additional review from acquirer or payment brand.  
*If checked, complete the following:*
- | Affected Requirement | Details of how legal constraint prevents requirement being met |
|----------------------|--|
|                      |  |
|                      |  |

### Part 3a. Acknowledgement of Status

**Signatory(s) confirms:**  
*(Check all that apply)*

- PCI DSS Self-Assessment Questionnaire C-VT, Version (*version of SAQ*), was completed according to the instructions therein.
- All information within the above-referenced SAQ and in this attestation fairly represents the results of my assessment in all material respects.
- I have confirmed with my payment application vendor that my payment system does not store sensitive authentication data after authorization.
- I have read the PCI DSS and I recognize that I must maintain PCI DSS compliance, as applicable to my environment, at all times.
- If my environment changes, I recognize I must reassess my environment and implement any additional PCI DSS requirements that apply.

**Part 3a. Acknowledgement of Status (continued)**

- No evidence of full track data<sup>1</sup>, CAV2, CVC2, CID, or CVV2 data<sup>2</sup>, or PIN data<sup>3</sup> storage after transaction authorization was found on ANY system reviewed during this assessment.
- ASV scans are being completed by the PCI SSC Approved Scanning Vendor (*ASV Name*)

**Part 3b. Merchant Attestation**

<i>Signature of Merchant Executive Officer</i> ↑	<i>Date:</i>
<i>Merchant Executive Officer Name:</i>	<i>Title:</i>

**Part 3c. QSA Acknowledgement (if applicable)**

If a QSA was involved or assisted with this assessment, describe the role performed:	
--	--

<i>Signature of Duly Authorized Officer of QSA Company</i> ↑	<i>Date:</i>
<i>Duly Authorized Officer Name:</i>	<i>QSA Company:</i>

**Part 3d. ISA Acknowledgement (if applicable)**

If a ISA was involved or assisted with this assessment, describe the role performed:	
--	--

<i>Signature of ISA</i> ↑	<i>Date:</i>
<i>ISA Name:</i>	<i>Title:</i>

---

<sup>1</sup> Data encoded in the magnetic stripe or equivalent data on a chip used for authorization during a card-present transaction. Entities may not retain full track data after transaction authorization. The only elements of track data that may be retained are primary account number (PAN), expiration date, and cardholder name.

<sup>2</sup> The three- or four-digit value printed by the signature panel or on the face of a payment card used to verify card-not-present transactions.

<sup>3</sup> Personal identification number entered by cardholder during a card-present transaction, and/or encrypted PIN block present within the transaction message.

## Part 4. Action Plan for Non-Compliant Requirements

Select the appropriate response for “Compliant to PCI DSS Requirements” for each requirement. If you answer “No” to any of the requirements, you may be required to provide the date your Company expects to be compliant with the requirement and a brief description of the actions being taken to meet the requirement.

*Check with your acquirer or the payment brand(s) before completing Part 4.*

PCI DSS Requirement*	Description of Requirement	Compliant to PCI DSS Requirements (Select One)		Remediation Date and Actions (If “NO” selected for any Requirement)
		YES	NO	
1	Install and maintain a firewall configuration to protect cardholder data	<input type="checkbox"/>	<input type="checkbox"/>	
2	Do not use vendor-supplied defaults for system passwords and other security parameters	<input type="checkbox"/>	<input type="checkbox"/>	
3	Protect stored cardholder data	<input type="checkbox"/>	<input type="checkbox"/>
