

Payment System Type 11

E-commerce merchant accepts card data using payment page presented to customers from own website

Payments sent via the merchant website

YOU ARE NOT ELIGIBLE TO USE THE DATA SECURITY ESSENTIALS EVALUATION

Unfortunately, you are not eligible to use the Data Security Essentials Evaluation approach due to the increased risk for your payment system type and how your payments are processed. You selected payment system type 11 for e-commerce merchants accepting card data using a payment page presented to your customers from your website and sending payments via your website.

Managing your own e-commerce payment page and website makes it difficult for you to properly secure your payment systems and greatly increases your risk of payment system compromise.

CONTACT YOUR MERCHANT BANK

We recommend you talk to your merchant bank about how you accept payments and the fact that there is no DSE Evaluation Form for your payment type. Ask them whether they can suggest alternative, simpler methods you can use to accept e-commerce payments.
