

Payment System Type 8

Payment terminal connected to electronic cash register with additional connected equipment

Payments sent via Internet

YOU ARE NOT ELIGIBLE TO USE THE DATA SECURITY ESSENTIALS EVALUATION

Unfortunately, you are not eligible to use the Data Security Essentials Evaluation approach due to the increased risk for your payment system type and how your payments are processed.

You selected payment system type 8 for a payment terminal(s) connected to an electronic cash register, with additional connected equipment; and all these systems are connected to the Internet for you to send your payments.

Internet-connected systems make it difficult for you to properly secure your systems and therefore greatly increase your risk of payment system compromise.

CONTACT YOUR MERCHANT BANK

We recommend you talk to your merchant bank about how you accept payments and the fact that there is no Data Security Essentials Evaluation Form for your payment type. Ask them whether they can suggest alternative, simpler systems you can use to accept payments.
