**STANDARDS ...**

A meme featuring Woody and Buzz Lightyear from the movie Toy Story. Woody is on the left, looking slightly concerned. Buzz is on the right, wearing his green and purple space suit and holding up his right hand with fingers spread, as if counting or listing items. The background is a simple room with a door and a window.

**STANDARDS EVERYWHERE**

	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026

## Target Areas

Physical device security
Key Management Operations
Payment Card/Instrument
Environmental Security
Software and Dev Process Security
Mobile Security
Payment Solution Security
Emerging Technology Framework

# Not Just Standards

Updating our standards also means we're updating our training and our programs

You will have seen some of this work with our modularized training over the last year or so already – more to come!

Aiming to make these better and more aligned as well

We're also implementing new programs, such as our PIN listing program, which will become a more generic key management listing program when KMO is ready to go

# ... Not just PCI SSC ...

- Working together means more than just PCI standards
- We're working with the wider industry as well
- You've heard of our TGG, RRG, BOA, GEAR, and other TLAs
- Also working closely with other industry bodies like FIDO and EMVCo
- Working with industry at large – see presentations from Amazon, Microsoft, Block, Cryptography experts, etc

# ... They're Your Standards Too!

- We're updating all of our standards and programs and training over the next few years
- Keep an eye out for our blogs on these updates
- Aligning where possible, deviating where necessary
- Have feedback – participate!
- Want more? PPOs get to be on our TGG and RRG groups
