

**PCI Security Standards Council Bulletin: MPoC SDK Integration Report v1.1 for PCI MPoC v1.x
Now Available**

20 May 2026

The PCI Security Standards Council (PCI SSC) has published the MPoC SDK Integration Report v1.1 for PCI Mobile Payments on COTS (MPoC) v1.x.

The updated Integration Report introduces additional clarification and confirmation related to the integration of listed Isolating MPoC SDKs into COTS-based MPoC Software, including alignment with applicable software management and third-party management processes associated with the listed MPoC Product.

The MPoC SDK Integration Report supports consistency and transparency for Vendor Verification and laboratory evaluations involving integrations of listed Isolating MPoC SDKs, while not introducing new technical or testing requirements beyond those already defined in the PCI MPoC Standard and Program documentation.

The MPoC SDK Integration Report forms part of the PCI MPoC Program documentation and must be considered, as applicable, during related Vendor Verification activities and laboratory evaluations.

For questions, please contact the MPoC Program Manager at MPOC@pcisecuritystandards.org.

The updated document is now available in the Document Library on the PCI SSC website.
